Approach® S6 Owner's Manual

WARNING
See the Important Safety and Product Information guide in the product box for product warnings and other important information.

Keys

1. Select to turn on the backlight. Hold to turn the device on and off.
2. Select to measure a shot (Measuring a Shot). Hold to reset the measurement.
3. Select to open the menu for the current screen.
4. Select to enter your score for the hole (Keeping Score). Hold to view scores for all holes.
5. Select to use CourseView (Using CourseView).
6. Select to return to the previous screen.

Turning on the Device
The device comes partially charged. You may need to charge the device before playing golf (Charging the Device).

NOTE: The time of day and date are set automatically when you go outdoors and the device locates satellites.
1. Hold , and follow the on-screen instructions.
2. Select Start Round.
3. Wait while the device locates satellites.

Unlocking the Device
After a period of inactivity, the device goes into watch mode and the screen is locked. The device displays the time and date, but does not use GPS.

Select any key except to unlock the device.

Charging the Device

WARNING
This device contains a lithium-ion battery. See the Important Safety and Product Information guide in the product box for product warnings and other important information.

NOTICE
To prevent corrosion, thoroughly dry the contacts and the surrounding area before charging or connecting to a computer.

1. Plug the USB cable into a USB port on your computer.
2. Align the charger posts with the contacts on the back of the device, and press the charger until it clicks.
3. Charge the device completely.

Playing Golf
Before you can play golf, the device must locate satellite signals. This may take 30–60 seconds.
1. Select Start Round.
2. Select a course from the list of nearby courses.
3. Tap the screen to scroll through the data screens for each hole.

TIP: You can select to return to the previous screen.

• 1 displays the hole information (Hole Information).
• 2 displays the layup and dogleg information (Viewing Layup and Dogleg Distances and Saved Locations).
• 3 displays the PinPointer feature (Using PinPointer).
• 4 displays the time of day.

The device automatically transitions when you move to the next hole.

Hole Information
By default, the device calculates the distance to the front, middle, and back of the green. If you know the location of the pin, you can set it more precisely using the green view (Viewing the Green).
Using CourseView
While playing a game, you can take a closer look at the course and view any location and distance on the course map.

1. Select ▲.
2. Touch or drag your finger to any location on the screen.
   The distance arc 1 displays the distance to the new location.
3. To see more of the hole, select ▲.

Viewing the Green
While playing a game, you can take a closer look at the green and move the pin location.

1. Select ▲.
2. Select ▼ at the top of the screen.
3. Drag ▼ to move the pin location.
   The distances on the hole information screen are updated to reflect the new pin location. The pin location is saved for only the current round.

Using PinPointer
The PinPointer feature is a compass that provides directional assistance when you are unable to see the green. This feature can help you line up a shot even if you are in the woods or in a deep sand trap.

NOTE: Do not use the PinPointer feature while in a golf cart. Interference from the golf cart can affect the accuracy of the compass.

Tap the screen until the compass screen appears.
   The arrow points to the pin location.

Viewing Layup and Dogleg Distances and Saved Locations
You can view a list of layup and dogleg distances for par 4 and 5 holes. Saved locations also appear on this list.

1. Select ▲.
2. If necessary, select ▼ to set up scoring or change par for the hole.
3. Select ▲ or ▼ to set the score.
   Your total score ▲ is updated.
4. Hold ▲ to view a list of the scores for all holes.
5. If necessary, select a hole to change the score for that hole.

Setting the Scoring Method
You can change the method the device uses to keep score.

1. Select an option:
   • If you are currently playing a round, select ▲ > ▼ > Setup Scoring.
   • If you are not currently playing a round, select ▼ > Setup > Scoring.
2. Select a scoring method.

About Stableford Scoring
When you select the Stableford scoring method (Setting the Scoring Method), points are awarded based on the number of strokes taken relative to par. At the end of a round, the highest score wins. The device awards points as specified by the United States Golf Association.

NOTE: The scorecard for a Stableford scored game shows points instead of strokes.

<table>
<thead>
<tr>
<th>Points</th>

</tr>
<tr>
<td>3</td>
<td>1 under</td>
</tr>
<tr>
<td>4</td>
<td>2 under</td>
</tr>
<tr>
<td>5</td>
<td>3 under</td>
</tr>
</tbody>
</table>

Enabling Handicap Scoring
1. Select ▲ > ▼ > Setup Scoring > Handicap Scoring.
2. Select an option:
   • Select Local Handicap to enter the number of strokes to be subtracted from the player's total score.
   The number of handicap strokes appear as dots on the hole information screen. The scorecard screen displays your handicap-adjusted score for each hole.
   • Select Index\Slope to enter the player's handicap index and the course slope rating to calculate a course handicap for the player.

Saving a Location
While playing a round, you can save up to five locations on each hole. Saving a location is useful for recording objects or obstacles that are not shown on the map. You can view the distance to these locations from the layup and dogleg screen (Viewing Layup and Dogleg Distances and Saved Locations).
1 Stand in the location you want to save.
   **NOTE:** You cannot save a location that is far from the currently selected hole.
2 Select \( \equiv > \) **Save Location.**
3 Select a label for the location.

**Measuring a Shot**
1 Take a shot, and watch where your ball lands.
2 Select \( \equiv \)
3 Walk directly to your ball.
   The distance automatically resets when you move to the next hole.
4 If necessary, hold \( \equiv \) to reset the distance at any time.

**Using the Odometer**
You can use the odometer to record the time and distance traveled. The odometer automatically starts and stops when you start or end a round, but you can also start and stop it manually.
1 Select \( \equiv > \) **Odometer** to view or start the odometer.
2 Select an option:
   - Select \( \equiv > \) **Turn Off** to stop the odometer.
   - Select \( \equiv > \) **Reset** to reset the time and distance to zero.

**Training**

**SwingStrength™**
The SwingStrength feature estimates how hard you swing the club by measuring acceleration and angular rate and comparing that with a known, normal swing. The SwingStrength value represents a percentage of your “full power swing” that is determined through a calibration process.

**Setting Up SwingStrength**
Before you can calibrate the SwingStrength feature, you must wear the device on your non-dominant hand. For example, right-handed golfers must wear the device on their left wrist.

- The club types include three groups: woods, long irons, and short irons. A 6-iron or lower is considered a short iron. A 7-iron or higher is considered a long iron. A 5-iron represents a percentage of your “full power swing” that is relatively close to the ideal swing tempo.
- TIP: Your SwingStrength levels can change over time. You can recalibrate anytime you feel like your SwingStrength level is no longer accurate.
1 Warm up, and take a few practice swings.
2 Select \( \equiv > \) **SwingStrength.**
3 Select a club type.
4 Complete a normal, full swing.
5 Select an option:
   - To save a good swing, select \( \checkmark \).
   - To delete a bad swing and try again, select \( \times \).
6 Repeat steps 3-5 for each club type.

**Analyzing Your Swing Using SwingStrength**
You can use the SwingStrength feature while practicing or during a round. You can use it when practicing at the driving range to improve consistency for your normal, full swing. You can also use this feature when you are trying to use a less-than-full swing. For example, you can swing your 9-iron at 50% and see how that affects the distance. During a round, when you need that distance, you can turn on the SwingStrength feature and take a couple practice swings at 50% before hitting your shot.
TIP: The SwingStrength feature works best when you make good contact with the ball.
1 Select \( \equiv > \) **SwingStrength.**

2 Select a club.
3 Complete a swing.

**Changing Your Club**
1 From the SwingStrength screen, select \( \equiv > \) **Change Club.**
2 Select a club.
3 If the club has not been calibrated, calibrate it now (Setting Up SwingStrength).

**TempoTraining**
The TempoTraining feature helps you perform a more consistent swing. The device measures and displays your backswing and downswing time. The device also displays your swing tempo. Swing tempo is the backswing time divided by the downswing time, expressed in a ratio. A 3 to 1 ratio, or 3.0, is the ideal swing tempo based on studies of professional golfers.

**The Ideal Swing Tempo**
You can achieve the ideal 3.0 tempo using different swing timings, for example, 0.7 sec./0.23 sec. or 1.2 sec./0.4 sec. Each golfer may have a unique swing tempo based on their ability and experience. Garmin® provides six different timings. The device uses three audible tones that continuously repeat the correct tempo. The first tone indicates when you should start your backswing. The second tone indicates when you should start your downswing. The third tone indicates when you should hit the ball.

The device also displays a graph that indicates if your backswing or downswing times are too fast, too slow, or just right for the selected timing.

**Changing the Tempo Timing**
1 Select \( \equiv > \) **TempoTraining.**
2 Use \( \uparrow \) or \( \downarrow \) to select a tempo.

**Analyzing Your Swing Using TempoTraining**
1 Select TempoTraining.
2 Complete a full swing.
Customizing Your Device

Tracking Statistics
You can enable statistics tracking on the device. You can view statistics, compare rounds, and track improvements using your Garmin Connect™ account (Garmin Connect).

Select ☰ > ☰ Setup Scoring > Stat Tracking > On.

Recording Statistics
1 Select ☰.
2 Select ☰ or ☰ to set the number of strokes taken. Your total score updates.
3 Select ▼.
4 Select ☰ or ☰ to set the number of putts taken.
5 Select ▼.
6 Select an option:
   • If your ball hit the fairway, select ☰.
   • If your ball missed the fairway, select ☰ or ☰.

Garmin Connect
Garmin Connect is your online statistics tracker where you can analyze and share all your rounds. You can connect with your friends on the Garmin Connect site or mobile app. Garmin Connect gives you the tools to track, analyze, share, and encourage each other. To sign up for a free account, go to www.garminconnect.com.

Store your rounds: After you complete and save a round with your device, you can upload that round to Garmin Connect and keep it as long as you want.

Analyze your data: You can view more detailed information about your round, including scorecards, statistics, course information, and customizable reports.

Share your activities: You can connect with friends to follow each other's activities or post links to your activities on your favorite social networking sites.

Phone Notifications
Phone notifications require a compatible smartphone to be paired with the Approach device. When your phone receives messages, it sends notifications to your device.

Enabling Bluetooth Notifications
NOTE: Your smartphone must support Bluetooth Smart in order to pair with your Approach device and synchronize data. See the application store for compatibility information.
NOTE: Enabling Bluetooth notifications reduces battery life while in watch mode (Specifications).

1 On your smartphone, enable Bluetooth wireless technology.
2 Bring your smartphone within 10 m (33 ft.) of your Approach device.
3 Go to http://www.garmin.com/apps or the application store for your smartphone, and download the Garmin Connect Mobile app.
4 Open the Garmin Connect Mobile app, and follow the on-screen instructions to connect a device.
5 On your Approach device, select ☰ > Setup > Bluetooth > Pair Mobile Device.
6 Follow the on-screen instructions.

When your Approach device receives a notification, it displays a message. You can select the message to open the notification.

Viewing Notifications
1 Select ☰ > Notifications.
2 Select a notification.
3 Select ▼ or ▲ to scroll through the contents of the notification.

System Settings
Select ☰ > Setup.
Bluetooth: Enables Bluetooth wireless technology (Phone Notifications).
Tones: Turns audible tones on or off.
Display: Sets the background color (Changing the Display Color) and the accent color.
Scoring: Sets the scoring method, enables or disables handicap scoring, and turns statistics tracking on or off (Keeping Score).
Time: Sets the time to automatic or manual (Setting the Time Manually).
Format: Sets the time format to 12- or 24-hour.
Language: Sets the text language on the device.
   NOTE: Changing the text language does not change the language of user-entered data or map data.
Units: Sets the unit of measure for distance.
Driver Dist.: Sets your saved driver distance from the tee box. This distance appears as an arc on the CourseView screen.
Handedness: Sets the device for a right-handed or left-handed player. This setting is important for the TempoTraining and SwingStrength features.
Lock Screen: Allows you to choose if the device times out and locks the touchscreen while you are playing golf or using the golf features. When you are not playing golf or using the golf features, the watch automatically times out after a period of inactivity (Unlocking the Device).

Setting the Time Manually
By default, the time is set automatically when the device acquires satellite signals.
1 Select ☰ > Setup > Time > Manual.
2 Select ☰ and ☰ to set the hour and minute.
3 Select AM or PM.

Changing the Display Color
You can change the background color on the device.
1 Select ☰ > Setup > Display.
2 Select an option:
   • Select White to display black text on a white background.
   • Select Black to display white text on a black background.

Changing the Accent Color
You can change the accent color on the device.
1 Select ☰ > Setup > Display > Accent.
2 Select an accent color.

Setting the Alarm
1 Select ☰ > Alarm > Setup Alarm.
2 Select ☰ and ☰ to set the hour and minute.
3 Select AM or PM.
4 Select Once, Daily, or Weekdays.

*The device withstands pressure equivalent to a depth of 50 m. For more information, go to [www.garmin.com/waterrating](http://www.garmin.com/waterrating).

Device Care

**NOTICE**

Avoid extreme shock and harsh treatment, because it can degrade the life of the product.

Avoid pressing the keys under water.

Do not use a sharp object to clean the device.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes.

Thoroughly rinse the device with fresh water after exposure to chlorine, salt water, sunscreen, cosmetics, alcohol, or other harsh chemicals. Prolonged exposure to these substances can damage the case.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Cleaning the Device

1. Wipe the device using a cloth dampened with a mild detergent solution.
2. Wipe it dry.

Troubleshooting

Touchscreen Tips

The touchscreen on this device is different than most mobile devices. You can operate the touchscreen with your finger tip or while wearing gloves. The touchscreen is optimized to prevent accidental touches while you play.

**NOTE:** You must press firmly in order to select items and change pages. You should practice using the touchscreen before you play golf.

- Tap the touchscreen to scroll through the pages.
- Tap the touchscreen to confirm messages.
- Make each touchscreen selection a separate action.

Getting More Information

- Go to [http://buy.garmin.com](http://buy.garmin.com), or contact your Garmin dealer for information about optional accessories and replacement parts.

Calibrating the Compass

**NOTE:** You must calibrate the electronic compass outdoors. Do not stand near objects that influence magnetic fields, such as cars, golf carts, buildings, or overhead power lines.

Your device was calibrated at the factory, and the device uses automatic calibration by default. If you experience irregular compass behavior, for example, after moving long distances or after extreme temperature changes, you can manually calibrate the compass.

1. From the hole information screen, select ☰ > Calibrate.
2. Follow the on-screen instructions.

Resetting the Device

If the device stops responding, you may need to reset it. This does not erase any of your data or settings.

1. Hold ⌘ for 15 seconds.
   The device turns off.
2. Hold ⌘ for one second to turn on the device.

Clearing User Data

**NOTE:** This deletes all user-entered data.

1. Hold ⌘ to turn off the device.
2. Hold ⌘, and select ⌘.
3. Select Yes.

Support and Updates

Garmin Express™ provides easy access to these services for Garmin devices. Some services may not be available for your device.

- Product registration
- Product manuals
- Software updates
- Map, chart, or course updates
- Vehicles, voices, and other extras
